**DEFINITIONS:** Numbers 1 through 7 show definitions of the list words. Select the correct word that matches the definition from the two words at the end of each line and write it in the blank space provided.

1. Game played by 2 teams of 11 players who try to score by kicking a ball into goals: ______ (actual, soccer)
2. Real or true – not fake: _______________________ (distant, actual)
3. Area where a battle is fought: ____________________ (battlefield, distant)
4. Not close in space or time – far away: _______________________ (distant, Mexican)
5. The part of a picture that is behind the main object: _________________ (background, actual)
6. A person born in the country of Mexico: __________________________ (soccer, Mexican)

**DEFINITION CLUES:** Choose the word that best goes with the statement or riddle. Write it in the blank space provided.

7. Fiction would not be this: _____________________________
8. If you took a picture of a friend at school, everything behind your friend is this: _________________
9. This is considered the most popular sport in the world, but not in the U.S.: ________________________
10. Men have died here and history has been made here: _________________________
11. If you heard a sound that was far away it would be this: _________________________
12. Sombreros, burritos, piñatas, maracas – These words are common to this group of people: _________________

**FILL-IN-THE-BLANK:** Read the sentence. Choose the vocabulary word that best goes in the blank space provided.

13. In the _________________ of the picture we could see the Rocky Mountains of western U.S.
14. The Bering Strait is a sea strait that separates Russia (to the west) and Alaska (to the east) by only 57 miles. Tens of thousands of years ago, it was believed that animals and humans were able to cross from Asia (of which Russia is part of) and into North America (of which Alaska is part of) because cold temperatures may have formed an ______________ ice bridge between the two continents.
15. The World Cup is an international football competition held every four years. By 2006, Brazil was the most successful World Cup team, having won the championship five times by this date. Using the word “football” is confusing for people in the United States, as Americans use the word football to describe a completely different game than what other countries call football. To describe the game “football” played in various countries internationally, Americans use the term ____________________.
16. The Milky Way is a disc shaped galaxy with spiral legs and comprised of some 300 billion stars. Although you can’t see it easily, all stars are rotating around the Milky Way’s center. Our very own solar system is located about 2/3 the way out from the center of Milky Way. We are traveling at a speed of 150 miles per second (240 km per second), and complete one revolution around the Galaxy in about 200 million years. If you look up on a dark clear night you can see a faint glow band across the sky. This glow is caused by the faint light emitted from millions of ______________ stars aligned along the disc.
17. The Aztecs and Mayas were two great civilizations 500 to 1500 years ago in the area we know today as Mexico. While people from America are called American, people from Mexico are called _________________.
18. The United States Civil War lasted from 1861 to 1865. It resulted in the deaths of more than 620,000 union and confederate soldiers. The bloodiest battle of the Civil War was fought between July 1st and July 3rd, 1863. It resulted in 51,000 men killed or wounded over this 3 day period. This equals 17,000 casualties per day. This historic event took place on the _________________ of Gettysburg in Pennsylvania. How many casualties would this be per hour? How many per minute?

17. The city of Chernobyl is in north Ukraine, near the country of Russia. It was made famous by a devastating accident at an electric power generating plant in 1986. In this accident, 20 firefighters immediately died from overexposure to radiation, while hundreds suffered from severe radiation sickness. People living near the power plant have seen greatly increased rates of thyroid cancer and birth defects among children. The radiation released from the plant occurred because of an unauthorized test resulting in an explosion that ripped off the top of the main building, resulting in 8 tons of radioactive waste being shot into the air. Because of safety concerns, ________________ power plant construction has decreased.
18. World War II began in 1939 and ended in 1945. Every major country in the world was involved in this war. The two sides included what is known as the “Axis” and “Allies.” The Axis Powers included Germany, Italy and Japan while the Allied Powers included the United States, Great Britain, France, the Soviet Union and China. On July 26th, 1945, Japan was given notice it would face “prompt and utter destruction” if it did not surrender. Japan did not respond. The United States then dropped nuclear bombs on the populated cities of Hiroshima and 3 days later on Nagasaki. This time Japan did ________________ by agreeing to the surrender terms. The war ended August 15th, 1945.
Vocabulary Building Worksheet – Level VI – Week 8D

molten reflect rewrite voltage chamber reflected

DEFINITIONS: Numbers 1 through 7 show definitions of the list words. Select the correct word that matches the definition from the two words at the end of each line and write it in the blank space provided. Teacher should briefly review all 7 words above with students before having them begin the exercise.

1. The force of an electrical current, expressed in volts: ________________ (chamber, voltage)
2. To write over again: ____________________ (reflect, rewrite)
3. An enclosed space in a machine or an animal’s body: ________________ (chamber, voltage)
4. Melted by heat: ________________ (reflected, molten)
5. To show an image of something on a shiny surface such as a mirror: ________________ (reflect, molten)
6. Rays that are bounced off a surface: ____________________ (reflected, voltage)

DEFINITION CLUES: Choose the word that best goes with the statement or riddle. Write it in the blank space provided.

7. If you had to redo a paper that you wrote, you did this: ____________________
8. If you looked in a mirror, it would do this to your image: ____________________
9. This happens to the sun’s rays when they hit a surface: ____________________
10. Melted rock that makes up the Earth’s mantle is this: ____________________
11. The heart has enclosed spaces that are called this: ____________________
12. The force that moves electrons through a circuit is this: ____________________

FILL-IN-THE-BLANK: Read the sentence. Choose the vocabulary word that best goes in the blank space provided.

13. The only active volcano on the European mainland is called Vesuvius. It is located in southern Italy just east of the city Naples. The summit (peak) is about 4,000 feet high. Vesuvius is famous for an eruption in the 1st century in the year 79. Two towns close to the base of the volcano, Pompeii and Herculaneum, were destroyed and covered by up to 75 feet (24 meters) of ash. Thousands of people died in this horrible event. Along with volcanic ash, volcanoes produce magma which is ____________ rock.
14. The heart is an amazing organ. A wall of muscle divides the heart into two cavities: the left cavity pumps blood throughout the body, while the right cavity pumps blood only through the lungs. Each cavity is in turn divided into two smaller areas called ____________ (s), the upper ones called atria, the lower ones ventricles. It is here that blood is sent to and from the heart.
15. Electricity is made by generators in power plants. The metal power lines extending out from power plants can carry electricity many miles. Electricity coming from the power plant is basically the movement of electrons through the wire. Electrical engineers (people who study electricity), have found that they can push more electrons through the wire for longer distances by increasing the __________________.
16. If your dog ate your homework paper you would have to ____________________ it.
17. Planets in our solar system can be seen with a telescope because they ________________ sunlight.
18. Why does the moon appear full one week and nearly invisible a few weeks later? The reason is because of the position of the moon in its 28 day travel around the earth. When the moon cannot be seen (called a new moon), the moon is between the sun and the earth, so we see the shadow side. 14 days later the moon has moved halfway around the earth which now places the earth between the sun and the moon. Here we see a bright full moon because sunlight is ________________ off the moon and back toward us.
